

# SOP-601: Nano Banana Pro for Amazon Product Images

**Version:** 2.0 **Created:** January 22, 2026 **Category:** Image Creation **Time Required:** 30-60 minutes per product **Skill Level:** Beginner-Intermediate

---

## Overview

Nano Banana Pro is Google's AI image generation model (built on Gemini) that creates professional e-commerce product images from simple phone photos. This is the **first AI capable of generating Amazon listing images indistinguishable from professional photography**.

### Why Nano Banana Pro?

Advantage	Description
No Photographer Needed	Create studio-quality images from phone photos
Text Generation	First AI that accurately renders text on products
Dimension Accuracy	Understands proportions, ratios, materials
Iterative Editing	Refine images through conversation
Cost Savings	~90% reduction vs traditional photography

### Tool Hierarchy (2026)

- Nano Banana Pro** (Primary) - Best for product photography
  - ChatGPT-4o** (Secondary) - Good for creative concepts
  - Midjourney** (Specialized) - Best for artistic/lifestyle scenes
- 

## Part 1: Setup & Access

### Step 1: Download the Gemini App

Nano Banana Pro is accessed through Google's **Gemini app**.

iOS: [App Store - Gemini](#) Android: [Google Play - Gemini](#)

### Step 2: Enable Nano Banana Pro

- Open Gemini app
- Tap your profile icon (top right)
- Go to **Settings > Image Generation**
- Look for **Nano Banana Pro** toggle under the thinking mode toggle
- Enable **Pro Mode** for full functionality

### Subscription Requirements

Plan	Image Limit	Resolution	Cost
Free	4-5 images/session	1K	\$0
Gemini Advanced	Unlimited	Up to 4K	~\$20/month

**Recommendation:** Start with the **30-day free trial** of Gemini Advanced to create a full product image set. After creating images for your products, you can downgrade if needed.

**Important:** On the free plan, after 4-5 image generations, you'll be bumped back to the basic Nano Banana model. For a complete Amazon listing set (7 images), you need Pro mode.

Step 3: Verify Setup

Test with a simple prompt:

Create a professional product photo of a coffee mug on a white background

If you get a high-quality image with accurate proportions, you're ready to proceed.

Part 2: Product Photo Preparation

Required: Multiple Reference Angles

**CRITICAL:** Nano Banana Pro needs multiple reference images to understand your product's full shape and features.

Minimum Photos	Ideal Photos
3 angles	5-7 angles

Photo Angle Checklist

- ☐ **Front view** - Main face of product
- ☐ **Back view** - Reverse side
- ☐ **Side view (left)** - Profile angle
- ☐ **Side view (right)** - Opposite profile
- ☐ **Top view** - Looking down
- ☐ **Detail shots** - Labels, textures, buttons, features
- ☐ **Scale reference** - Next to common object (optional)

Photo Quality Guidelines

**DO:**

- ✓ Use good lighting (natural daylight preferred)
- ✓ Keep background simple (white/neutral is ideal)
- ✓ Capture all text/labels clearly
- ✓ Show product dimensions accurately
- ✓ Include close-ups of important features

**DON'T:**

- ✗ Use blurry or dark photos
- ✗ Cut off edges of product
- ✗ Have distracting backgrounds
- ✗ Miss any angles with text/labels

Upload Process

- 1. Open Gemini app
- 2. Tap the + or camera icon
- 3. Select **Upload from gallery** or take new photo
- 4. Upload **ALL reference images at once** before your first prompt

## Part 3: Amazon Image Types & Prompts

### Image Type Overview

#	Image Type	Purpose	Priority
1	Primary/Main Image	White background product shot	REQUIRED
2	Lifestyle Image	Product in use/context	HIGH
3	Benefits Graphic	Key selling points visual	HIGH
4	Features Graphic	Technical specs visual	MEDIUM
5	Use Cases	Multiple applications	MEDIUM
6	What's Included	Package contents visual	MEDIUM
7	Size/Scale Image	Dimensions reference	MEDIUM
8	Comparison Graphic	vs. competitors	OPTIONAL
9	Guarantee/Warranty	Trust signals	OPTIONAL
10	Ingredients/Materials	For applicable products	OPTIONAL

**Realistic Expectations:** From the live demo experience, expect at least **2-3 images ready to upload immediately**. Some may need minor touch-ups in Canva. At minimum, you should get a solid **primary image + lifestyle shot**.

## Part 4: Professional Prompt Structure

### The Clarity-First Framework

Research shows the most effective prompts follow this structure:

PROFESSIONAL PROMPT STRUCTURE

1. ROLE DEFINITION (Who)

"You are a professional product photographer specializing in Amazon e-commerce..."

2. TASK/OBJECTIVE (What)

"Create a hero shot that emphasizes premium materials and craftsmanship..."

3. CAMERA SETTINGS (Technical)

"85mm lens, f/2.8 aperture, ISO 100..."
4. LIGHTING SETUP (Atmosphere) "Key light at 45°, soft fill, rim lighting, color temperature 5500K..."
5. COMPOSITION (Layout) "Product fills 85% of frame, rule of thirds, negative space on right..."
6. AMAZON COMPLIANCE (Requirements) "Pure white background RGB 255,255,255, no text, no watermarks, 1:1 aspect ratio..."

Camera Settings Reference

Setting	Value	Effect
Lens	85mm	Flattering perspective, minimal distortion
Lens	50mm	Natural look, "human eye" perspective
Lens	100mm macro	Extreme detail, texture visibility
Aperture	f/1.8-2.8	Shallow DOF, blurred background
Aperture	f/8	Sharp throughout (best for products)
ISO	100	Clean, no grain
White Balance	5500K	Neutral daylight
White Balance	4000K	Warm, inviting
White Balance	6500K	Cool, technical

Lighting Terminology

Term	Position	Effect
Key Light	45° front-side	Primary illumination, defines shadows
Fill Light	Opposite side	Reduces shadow intensity
Rim/Back Light	Behind product	Creates edge separation
Softbox	Large diffused source	Soft, even lighting
High-Key	Bright overall	White background, minimal shadows
2:1 Fill Ratio	Key 2x brighter	Moderate shadow detail
3:1 Fill Ratio	Key 3x brighter	Dramatic shadows

## Part 5: Prompt Templates

### 5.1 Primary/Main Image (Amazon Required)

**Purpose:** Clean white background product photo for main listing image

**Professional Prompt:**

You are a professional product photographer specializing in Amazon e-commerce product visualization. Create a hero shot for this product that will serve as the primary Amazon listing image.

**CAMERA:** Shot with an 85mm prime lens at f/8 aperture, ISO 100, producing sharp focus throughout the product with professional clarity.

**LIGHTING:** Professional studio setup with key light at 45 degrees creating soft, defined shadows. Fill light at 2:1 ratio maintaining dimension while revealing detail. Subtle backlight for product edge separation. Color temperature 5500K (neutral daylight) for accurate color representation.

**COMPOSITION:** Product centered, filling 85% of frame. Square 1:1 aspect ratio. Gentle contact shadow under product for grounding.

**AMAZON COMPLIANCE:** Pure white background (RGB 255,255,255). No text, graphics, watermarks, props, or promotional elements. Photorealistic quality, minimum 1600px resolution.

**Amazon Compliance Checklist:**

- ☐ White background (RGB 255,255,255)
- ☐ Product fills 85%+ of frame
- ☐ No text/graphics/watermarks
- ☐ Professional lighting with natural shadow
- ☐ Square format (1:1 ratio)

---

### 5.2 Lifestyle Images

**Purpose:** Show product in real-world use context

**Professional Prompt:**

You are a professional lifestyle and commercial product photographer creating authentic product-in-use imagery for Amazon listings.

Create a lifestyle photograph showing this [PRODUCT TYPE] being used by [TARGET USER - e.g., "a 35-year-old homeowner"] in [SETTING - e.g., "a modern backyard patio with a hot tub"].

**CAMERA:** Shot with a 50mm lens at f/2.8 for natural perspective with subtle background blur. ISO 200 for clean detail.

**LIGHTING:** Natural golden hour sunlight (4000K warm color temperature)

creating inviting atmosphere. Soft shadows, no harsh contrast.  
[OR: "Natural window light diffused through sheer curtains"]

COMPOSITION: Product clearly visible and in focus as the hero element.  
Rule of thirds positioning. Environmental context visible but not distracting. Authentic, candid moment captured.

STYLE: Photorealistic, warm and inviting. Aspirational but attainable lifestyle. Professional editorial photography quality.

**Example - Hot Tub Filter:**

You are a professional lifestyle photographer specializing in outdoor living and home improvement products for Amazon e-commerce.

Create a lifestyle photograph showing this spa filter being installed by a confident 40-year-old homeowner in their beautiful backyard hot tub area.

CAMERA: 50mm lens, f/4, capturing both the person and the clean spa environment. Sharp focus on the filter and hands.

LIGHTING: Late afternoon golden hour sunlight (4200K) creating warm, inviting atmosphere. Natural shadows. The spa water reflects soft light.

COMPOSITION: The homeowner is mid-action, installing the filter. Hot tub and manicured backyard visible. Product is the clear focal point.

STYLE: Authentic moment, aspirational outdoor living aesthetic. Professional lifestyle photography suitable for Amazon secondary images.

**Lifestyle Settings by Product Type:**

Product Category	Suggested Settings	Lighting
Pool/Spa	Backyard, patio, deck	Golden hour, 4000-4500K
Camping	Campsite, forest, lake	Morning light, 5000K
Home	Living room, kitchen	Window light, 4500K
Fitness	Gym, outdoor workout	Bright, energetic, 5500K
Kitchen	Modern kitchen scene	Warm overhead, 3500-4000K

**5.3 Benefits Graphic**

**Purpose:** Visually communicate top 3-4 product benefits

**Professional Prompt:**

You are a professional graphic designer and marketing specialist creating high-converting Amazon listing infographics.

Create a benefits-focused product graphic showing the top 4 selling points of this product.

LAYOUT: Product hero shot in center (photorealistic, studio quality). Four benefit callouts positioned around the product with clean icons and concise text.

**BENEFITS TO HIGHLIGHT:**

1. [BENEFIT 1 – e.g., "Superior Filtration – Captures 10-micron particles"]
2. [BENEFIT 2 – e.g., "Long-Lasting – 3-6 month lifespan"]
3. [BENEFIT 3 – e.g., "Easy Installation – No tools required"]
4. [BENEFIT 4 – e.g., "Universal Fit – Type VI compatible"]

PHOTOGRAPHY STYLE: The product image should appear as if shot with an 85mm lens, f/5.6, professional softbox lighting, on a gradient background that complements the color scheme.

GRAPHIC DESIGN: Clean, modern, professional. High contrast for mobile readability. Icons are simple and universally understood. Typography is bold and scannable. Color scheme: [BRAND COLORS or "professional blue (#2563eb) with white accents"].

Amazon-optimized: Text readable at thumbnail size. No competitor brand names. Professional infographic quality.

**Example - Hot Tub Filter:**

You are a professional e-commerce graphic designer creating Amazon listing infographics for pool and spa products.

Create a benefits graphic for this spa filter highlighting why customers should choose this product.

LAYOUT: Filter product centered with professional studio lighting. Four benefits arranged in quadrants around the product.

**BENEFITS:**

1. "Superior Filtration" – Icon: water droplet with filter mesh  
Subtext: "Captures particles down to 10 microns"
2. "Long-Lasting" – Icon: calendar/clock  
Subtext: "3-6 month lifespan saves money"
3. "Easy Installation" – Icon: hand with thumbs up  
Subtext: "No tools required"
4. "Universal Fit" – Icon: checkmark in circle  
Subtext: "Works with Type VI systems"

STYLE: Pool/spa aesthetic with blue (#0ea5e9) and white color scheme. Clean gradient background. Product photographed with soft rim lighting for premium appearance. Mobile-optimized text sizing.

---

## 5.4 Features Graphic

**Purpose:** Technical specifications and product features

**Professional Prompt:**

You are a professional technical illustrator and product marketing specialist creating feature callout graphics for Amazon listings.

Create a technical features graphic showing this product with precise callout lines pointing to key specifications.

PRODUCT PHOTOGRAPHY: Capture the product at a slight 3/4 angle using an 85mm lens, f/8 for full sharpness. Professional studio lighting with key light at 45°, soft fill, and subtle rim light for dimension. Clean gradient or solid background.

FEATURES TO HIGHLIGHT:

- [FEATURE 1]: [Technical description - e.g., "Antimicrobial filter media"]
- [FEATURE 2]: [Technical description - e.g., "Reinforced end caps"]
- [FEATURE 3]: [Technical description - e.g., "Tri-lobal fiber design"]
- [FEATURE 4]: [Technical description - e.g., "Standard Type VI dimensions"]

GRAPHIC ELEMENTS: Clean callout lines (thin, professional) connecting each feature to its location on the product. Labels positioned for clear reading, no overlap. Technical diagram aesthetic but visually appealing. Color scheme: [BRAND COLORS or "professional gray and blue"].

TYPOGRAPHY: Bold feature names, lighter description text. Readable at mobile size. Professional sans-serif font.

---

## 5.5 Use Cases Image

**Purpose:** Show multiple applications/scenarios for the product

**Professional Prompt:**

You are a professional lifestyle photographer creating a multi-scene use case graphic for an Amazon product listing.

Create a 2x2 grid collage showing 4 different scenarios where this product is used:

SCENES:

1. TOP LEFT - [USE CASE 1 - e.g., "Family pool time" - parents and kids enjoying a clean pool]
2. TOP RIGHT - [USE CASE 2 - e.g., "Spa maintenance" - homeowner performing routine filter check]
3. BOTTOM LEFT - [USE CASE 3 - e.g., "Hot tub relaxation" - couple enjoying crystal clear spa water]
4. BOTTOM RIGHT - [USE CASE 4 - e.g., "Inflatable pool care" - summer backyard scene with kids]

PHOTOGRAPHY STYLE: Each scene shot with 35mm lens for environmental context. Natural lighting appropriate to each setting (outdoor: golden hour 4200K, indoor: warm ambient 3800K). Shallow depth of field with product/result clearly visible.

CONSISTENCY: All four images share same color grading, similar exposure levels, and cohesive lifestyle aesthetic. Product or its benefit (clean water) is visible in each scene.

LAYOUT: Clean grid with thin white borders between scenes. Optional small text labels for each use case. Professional lifestyle collage suitable for Amazon secondary images.

---

## 5.6 What's Included Image

**Purpose:** Show all items that come with the purchase

**Professional Prompt:**

You are a professional product photographer creating a "What's in the Box" flat lay image for an Amazon listing.

Create a professional package contents photograph showing all items that come with this purchase, neatly arranged.

ITEMS TO DISPLAY:

1. [MAIN PRODUCT – e.g., "Spa filter cartridge"]
2. [ACCESSORY 1 – e.g., "Installation guide"]
3. [ACCESSORY 2 – e.g., "Warranty card"]
4. [ACCESSORY 3 – if applicable]

PHOTOGRAPHY STYLE: Shot from directly above (flat lay) with 35mm lens, f/11 for full sharpness across all items. Professional softbox lighting from above, no harsh shadows. Color temperature 5500K (neutral daylight).

COMPOSITION: Items arranged with intentional spacing, creating visual breathing room. Largest item (main product) positioned prominently. Smaller items arranged by size/importance. Clean white or light gray seamless background.

LABELS: Small, clean text labels identifying each item. Professional sans-serif typography. Optional: quantity indicators (e.g., "x2").

STYLE: Premium unboxing experience aesthetic. Items appear pristine and well-organized. Professional e-commerce photography quality.

---

## 5.7 Size/Scale Comparison Image

**Purpose:** Help customers understand product dimensions

**Professional Prompt:**

You are a professional product photographer creating a size reference image that helps Amazon customers understand exact product dimensions.

Create a scale comparison photograph showing this product next to universally recognizable reference objects.

REFERENCE OBJECTS (choose appropriate):

- Human hand (for graspable products)
- Smartphone (widely understood size)
- Standard water bottle (common reference)
- Ruler or measuring tape (explicit dimensions)
- Dollar bill/credit card (precise known size)

PHOTOGRAPHY STYLE: Shot with 85mm lens, f/8 for full sharpness.

Professional studio lighting with soft key light at 45°, gentle fill.

Color temperature 5500K. Clean white or neutral gray background.

COMPOSITION: Product and reference object positioned side-by-side with appropriate spacing. Both items fully visible and in sharp focus. Product is the hero; reference object is supporting element.

DIMENSION CALLOUTS: Clean measurement lines/arrows showing actual dimensions: [LENGTH] x [WIDTH] x [HEIGHT]. Professional typography. Measurements in both inches and centimeters for international buyers.

STYLE: Technical accuracy meets professional aesthetics. Clear, informative, builds buyer confidence.

---

## 5.8 Guarantee/Warranty Image

**Purpose:** Build trust with warranty/guarantee messaging

**Professional Prompt:**

You are a professional graphic designer creating trust-building warranty and guarantee graphics for Amazon product listings.

Create a professional guarantee/warranty badge graphic that builds customer confidence in this purchase.

DESIGN ELEMENTS:

- Central badge/shield icon (premium, trustworthy design)
- Primary text: "[X-YEAR] WARRANTY" or "100% SATISFACTION GUARANTEED"
- Supporting text: "[Specific guarantee details]"
- Optional: Product image integrated with badge design

COLOR PSYCHOLOGY:

- Blue (#2563eb) = Trust, reliability, professionalism
- Green (#10b981) = Safety, approval, positive outcome
- Gold (#f59e0b) = Premium quality, value, excellence

TYPOGRAPHY: Bold, confident headline. Clean supporting text.

Professional sans-serif fonts. High contrast for mobile readability.

STYLE: Premium badge/seal aesthetic. Conveys confidence without appearing gimmicky. Professional trust signal that enhances perceived product value. Clean background that complements badge.

BRAND INTEGRATION: [BRAND COLORS] if specified, otherwise use trust-conveying blue and gold combination.

---

## 5.9 Competitor Comparison Graphic

**Purpose:** Show advantages vs. competitors (without naming brands)

**Professional Prompt:**

You are a professional marketing designer creating a competitive comparison infographic for an Amazon product listing.

Create a side-by-side comparison graphic showing this product's advantages versus generic competitors.

LAYOUT: Two-column comparison format

- LEFT COLUMN: "Standard [Product Type]" (generic competitor)
- RIGHT COLUMN: "Our [Product Name]" (this product)

COMPARISON POINTS:

COMPETITOR (LEFT):

- [Weakness 1 - e.g., "Basic filtration"]
- [Weakness 2 - e.g., "1-2 month lifespan"]
- [Weakness 3 - e.g., "Standard construction"]

OUR PRODUCT (RIGHT):

- [Strength 1 - e.g., "Premium antimicrobial media"]
- [Strength 2 - e.g., "3-6 month extended life"]
- [Strength 3 - e.g., "Reinforced end caps"]

VISUAL INDICATORS:

- Green checkmarks for our product strengths
- Red X marks for competitor weaknesses
- Clean iconography supporting each point

PHOTOGRAPHY: Both products shown with identical studio lighting (softbox, 5500K, f/8 sharpness). Our product appears slightly larger or more prominently positioned. Professional product photography integrated with infographic design.

COLOR SCHEME: Professional contrast - competitor side uses muted grays, our product side uses brand colors or confident blue (#2563eb).

COMPLIANCE: NO real competitor brand names, logos, or identifiable products. Use only generic terms: "standard," "basic," "typical," "ordinary," "regular."

**Important:** Never mention specific competitor brand names - use generic terms like "standard," "basic," or "typical."

---

## Part 6: Iterative Refinement

### The Power of Conversation

Nano Banana Pro allows you to **refine images through conversation**. This is its killer feature.

#### Refinement Prompts

##### Change Text:

Change the text to say "[NEW TEXT]" instead

##### Adjust Colors:

Change the background color to [COLOR]  
Make the lighting warmer/cooler

##### Modify Composition:

Move the product more to the left  
Zoom in closer on the product  
Add more space around the edges

##### Fix Issues:

The label text is slightly wrong - please regenerate with accurate text  
Make the shadow more subtle  
Remove the reflection on the right side

##### Add Elements:

Add a subtle steam effect rising from the spa  
Include a hand reaching to install the filter  
Add water droplets on the product

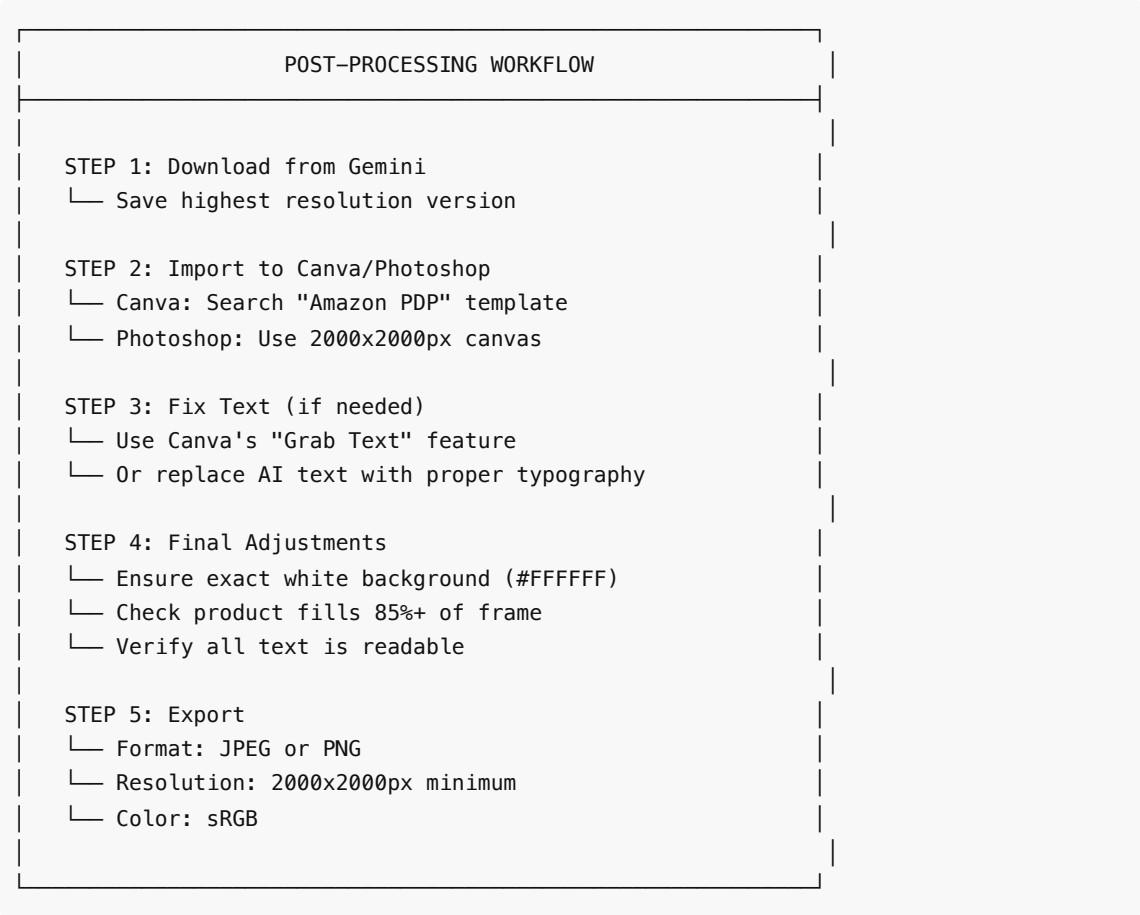

#### Refinement Best Practices

1. **Be Specific** - "Make it bluer" is worse than "Change to navy blue (#1a365d)"
  2. **One Change at a Time** - Don't ask for 5 changes at once
  3. **Reference Previous** - "Keep everything else the same, but..."
  4. **Save Good Versions** - Download images you like before further edits
- 

## Part 7: Post-Processing Workflow

### When AI Output Needs Finishing

Sometimes Nano Banana Pro gets 90% there but needs finishing touches. Use this workflow:

Canva Quick Workflow

- 1. Open Canva, search "Amazon PDP"
- 2. Upload all AI-generated images
- 3. Drag images into template slots
- 4. Click image > Edit > **Grab Text** (extracts text for editing)
- 5. Adjust text font, size, color as needed
- 6. Export at highest quality

Part 8: Complete Amazon Listing Image Set

Recommended 7-Image Set

Slot	Image Type	Prompt Type	Notes
1	Main Image	Primary (5.1)	REQUIRED - White BG
2	Lifestyle	Lifestyle (5.2)	Product in use
3	Benefits	Benefits (5.3)	Top 4 selling points
4	Features	Features (5.4)	Technical callouts
5	Use Cases	Use Cases (5.5)	Multiple scenarios

6	Scale/Size	Size/Scale (5.7)	Show dimensions
7	Lifestyle #2	Lifestyle (5.2)	Different angle/user

**Generation Order (Recommended)**

- 1. **Main Image First** - This establishes the "look" for consistency
- 2. **Benefits & Features** - High-converting graphics
- 3. **Lifestyle Images** - Contextual shots
- 4. **Supporting Images** - Scale, comparisons, etc.

**Part 9: Advanced Prompting Techniques**

**Technique 1: Photography Terms**

Add professional photography terms for better results:

Camera Settings:

- "85mm prime lens" - Portrait-style compression
- "f/2.8" - Shallow depth of field (blurred background)
- "f/8" - Sharp throughout (product shots)
- "ISO 100" - Clean, no grain

Lighting Terms:

- "Softbox lighting" - Even, professional
- "High-key lighting" - Bright, white background
- "Rim lighting" - Glowing edge effect
- "Natural window light" - Soft, authentic feel

Composition Terms:

- "Rule of thirds" - Off-center placement
- "Negative space" - Room around product
- "Hero shot" - Dramatic, prominent

**Technique 2: Reference Image Stacking**

For complex products, "stack" reference images:

Upload these images:

- 1. [Product front photo]
- 2. [Product side photo]
- 3. [Product detail photo]
- 4. [Reference image showing desired style/mood]

Then prompt:

"Using the product in images 1-3, create an image in the style and mood of image 4. Keep the product 100% accurate to the reference photos."

**Technique 3: Iterative Generation**

Instead of one perfect prompt, use a conversation:

Prompt 1: "Create a professional product photo of this filter"  
[Review result]

Prompt 2: "Good, but make the background pure white"  
[Review result]

Prompt 3: "Perfect. Now add soft shadow underneath"  
[Review result]

Prompt 4: "Make the shadow 50% more subtle"  
[Final result]

## Part 10: Troubleshooting

### Common Issues & Solutions

Issue	Cause	Solution
Distorted product	Not enough reference angles	Upload 5+ angles including all sides
Wrong text on label	AI interpretation	Upload close-up of label, explicitly describe text
Unrealistic proportions	Scale confusion	Include size reference in photo or describe dimensions
Inconsistent style	Different prompts	Use same style descriptors across all images
Low resolution	Default output	Request "high resolution, 4K, detailed" in prompt
Wrong colors	Lighting in reference	Shoot reference photos in neutral daylight

### When to Use Photoshop/Canva Instead

- **Text replacement** - If AI keeps getting text wrong
- **Logo placement** - For brand-consistent logo application
- **Color matching** - Exact brand color requirements
- **Composite images** - Combining multiple AI outputs

## Part 11: Amazon Compliance Checklist

### Main Image Requirements (Mandatory)

- ☐ Pure white background (RGB 255, 255, 255)
- ☐ Product fills 85% or more of image frame
- ☐ No text, graphics, or watermarks
- ☐ No badges or promotional elements
- ☐ Product is in focus and well-lit
- ☐ Accurate color representation

- ☐ Minimum 1000px on longest side (2000px recommended)
- ☐ JPEG, PNG, GIF, or TIFF format
- ☐ sRGB or CMYK color mode

### Secondary Image Best Practices

- ☐ 2000x2000px resolution minimum
- ☐ Consistent style across all images
- ☐ Text is readable and accurate
- ☐ No competitor brand names
- ☐ Shows product benefits clearly
- ☐ Mobile-optimized (readable on small screens)

---

## Quick Reference Card

### Essential Prompts (Copy & Use)

#### Main Image (Professional):

You are a professional product photographer for Amazon e-commerce. Create a hero shot: 85mm lens, f/8, ISO 100. Key light at 45°, soft fill (2:1 ratio), subtle rim light. Color temp 5500K. Pure white background (RGB 255,255,255). Product centered, filling 85% of frame. No text, graphics, or props. 1:1 aspect ratio, 1600px+ resolution.

#### Lifestyle (Professional):

You are a professional lifestyle photographer. Create an authentic product-in-use image: 50mm lens, f/2.8, natural golden hour light (4200K). [USER DESCRIPTION] using this product in [SETTING]. Product clearly visible as hero element. Rule of thirds composition. Aspirational but attainable lifestyle aesthetic.

#### Benefits Graphic (Professional):

You are a professional e-commerce graphic designer. Create a benefits infographic: Product hero shot (85mm, f/5.6, softbox lighting) in center. 4 benefits with icons around product:

- 1) [BENEFIT + detail]
- 2) [BENEFIT + detail]
- 3) [BENEFIT + detail]
- 4) [BENEFIT + detail]

Color scheme: [COLORS]. Mobile-optimized text. Professional quality.
